AC CONDITIONERS - THE BEST

Furutech e-TP609 Power Distribution Module

\$980

furutech.com

The e-TP609 doesn't provide any active power-purification/filtration. Instead, this six-outlet power distribution module features a robust metal chassis, vibration-damped "Axial Locking" AC outlets, ultra-high-purity copper wiring, passive noise filtration, and cryogenically treated metal parts. The result is reduced background noise, and an organic ease that allows music to flow freely. Reviewed by Chris Martens, Issue
